Sacramento county board of Supervisors,

It is my hope that this board is more informed and also wiser to the facades surrounding Newsoms emergency declarations.. THIS time in regards to Monkeypox virus. The ratifications that he is attempting to base this emergency declaration on is extremely biased in the nature of this disease.

When considering the disease itself and the people group it seems to be most prevalent in, the mere fact that the ENTIRE population of this state is lumped into that category is absolutely appalling.

INSTEAD of USING it to further push for control and power over the people of this state, the wiser move, (and less political i might add) would be to push for the treatment which IS READILY AVAILABLE for this ailment NOT A PROCLAMATION OF A STATE OF EMERGENCY. It is VERY clear that this is a political move to continue to cripple this state and the people therein. WE know it and we know that YOU do as well. If you cannot see that, then you are in fact, ill-informed. The seat you hold is one that has a great responsibility to truth and understanding.

Our hopes are;

- that you the board are NOT sheep...that you are in fact in the positions you hold FOR the people and NOT for position, power and pay.

-that you do TRUE and FAIR research therefore equipping you for you leadership position.

-that you are wise enough to 'see' with eyes that seek truth and not a political narrative.

-that you actually care about your constituents and this state and STOP the tyranny that is plaguing this state due to the political nonsense narrative that is DESTROYING this once beautiful state.

-that you start seeing the MAJORITY of your constituents and STOP the prejudice that has arisen against people who want to live upright and without dictatorship and BENDING to the few.. those who are trying to make changes based on their OWN preferences and FORCING EVERYONE to comply to their antics. They wanna live that way?..fine! But DO NOT PUSH YOUR MINDSET ON OTHERS.

You say you care about this state...hold a seat of one who should.
Yet the board CONTINUES to operate and participate ALONG SIDE of the destuctive narrative.

Remember, whats wrong will ALWAYS be wrong.

Whats right will leave a legacy.

What will YOUR legacy be? Will it show that you stood against tyranny and found a solution to a situation thru means of HELP and not HINDERANCE?

Will it show that you cared for the people in this state and DIDNT CAVE to the false narrative that was set about to destroy the very people/state that you serve?

PLEASE DO THE RESEARCH...FAIR AND RIGHT RESEARCH before you decide to pass this evil overreach.

This disease is a sexually transmitted disease in the gay community. The fact that the whole state is being lump summed into this action is an act of prejudice and the constituents are NOT HAPPY NOR DO WE SUPPORT THIS ACT OF POWER GRABBING. Lump summing all constituents into this category is absolutely appalling.

Please oppose this ratification along side the people whom you say you serve. Or Abstain even.

Instead, do the most constructive action...getting available treatment to the infected.

Novel idea.

We, the people, are watching and have had quite a bit ENOUGH of the destruction of our state.

We are asking you to oppose this Ratification of the state of emergency, Stop the precedent of onslaught that is seeking to destroy this state...which ultimately, due to the politics, will flow on down the river to the next and the next state.

PLEASE STAND AGAINST THE TYRANNY.

PLEASE VOTE NO ON THIS...

OR EVEN ABSTAIN.

Thank you.. your constituent

Attention to all Sacramento County Supervisors.

I am opposed to the ratification of these proclamations. Rather than writing an abundance of duplicate information I would direct you to read the emails you have received from Gabrielle Ingram, Founder of Stand Up Sacramento County. There are thousands of us in the community who are (and have been) researching and staying on top of matters placed in front of the Sacramento Board of Supervisors, as well as other State Legislative Branches.

While Gabrielle may give you guys a lot of grace, I do not. I do not believe that all of you are simply misinformed. I see your actions as agenda based and very likely corrupt. I personally have had enough of the corruption and tyranny displayed in California over the last 2+ years... and that is just when I started paying attention. Seems it has been going on for much longer. I will never not pay attention again. Please know that each action you take is being carefully watched and documented. One day, we will have a lawsuit I am certain and when that day comes I am quite confident that a few of your names will be on the defendants list. Eyes are on you. Act accordingly.

Supervisor Kennedy,

Here is a quote from the Proclamation in question:

"WHEREAS, while most cases resolve within a few weeks, Monkeypox can lead to significant acute health impacts, including severe pain, hospitalization, long-term symptoms, and in rare instances, death; and".

Let's put this in very simple terms. A state of emergency is being proposed because of 'significant health impacts'. Not death.

Here are some health issues, according to our beloved CDC, that ACTUALLY do kill people:

<https://www.cdc.gov/nchs/fastats/leading-causes-of-death.htm>. Top of the list is heart disease, cancer, and the COVID shots. (I attended a funeral for a friend that died from the effects of this shot over the past weekend.)

Where is the public emergency on those things? If we are going to have public health emergencies, isn't it logical that it would be for the things that are killing people? Medical protocols cause severe pain and hospitalization - are we going to make that a public health emergency?

I oppose the ratification of these proclamations, and ask that you and your peers do the same. I am asking nicely.

Thank you.
Constituent in District 2.
